

# AGL 120: Applications of Agile Principles

This course allows the student to continue their agile learning path while utilizing knowledge and tools to engage in team planning for achieving the client deliverable. This course focuses on steps and tools to aid in planning strategies with agile. Utilization of concepts such as Lean and Kanban are discussed as well as addressing the pitfalls to avoid in planning. This is the second in a set of three courses designed to help students learn many of the topics that are covered by several of the agile certifying bodies including Project Management Institute (PMI) and Scrum.org.

*Course to be sunset by May 30, 2025. The sunset of a course or program does not have any impact on the validity of the earned credential. Students who are not able to complete a program prior to the sunset date will be able to do so with approved replacement courses in accordance with other academic policies.*
