

BPM 110: Essentials of Business Process Management

This course focuses on the overall benefits of BPM within an enterprise, and the key business and technology drivers needed for overall alignment with essential business objectives. Students will learn critical BPM practices and change management skills to become a process leader within their organization. The course will also cover the linkage between BPM, project management, and Lean Six Sigma.

Course to be sunset by May 30, 2025. The sunset of a course or program does not have any impact on the validity of the earned credential. Students who are not able to complete a program prior to the sunset date will be able to do so with approved replacement courses in accordance with other academic policies.
