BSI 110: Essentials of Business Intelligence

This course introduces students to the value and structure of the key concepts in enterprise business intelligence. Understanding the core skills of data management, warehousing, BI requirements and data quality is the first step to making effective and efficient business decisions. The course specifically discusses the tools needed to select and evaluate data warehouse technology and platforms.

Course to be sunset by May 30, 2025. The sunset of a course or program does not have any impact on the validity of the earned credential. Students who are not able to complete a program prior to the sunset date will be able to do so with approved replacement courses in accordance with other academic policies.
