BSI 120 : Mastering Data Management and Technology

Building upon the foundational concepts gained in Essentials of Business Intelligence, students will explore more advanced topics including data modeling, MDM, industry data standards, securing BI content, and reporting and performance management. With case studies and exercises, students gain real-world insight into all facets of business intelligence. Throughout the course, students gain the skills needed to create a business case for improving data quality, cost benefit analysis, impact and root causes.

Course to be sunset by May 30, 2025. The sunset of a course or program does not have any impact on the validity of the earned credential. Students who are not able to complete a program prior to the sunset date will be able to do so with approved replacement courses in accordance with other academic policies.
