

BSI 130: Advanced Data Architecture and Intelligence

This course will help students master the skills needed to lead and manage business intelligence initiatives. In this course, students gain advanced data analytics and modeling skills, along with the best ETL and MDX practices to make sophisticated and effective business decisions. Specific topics include the ability to model and analyze data for strategic and effective decision making.

Course to be sunset by May 30, 2025. The sunset of a course or program does not have any impact on the validity of the earned credential. Students who are not able to complete a program prior to the sunset date will be able to do so with approved replacement courses in accordance with other academic policies.
