

SSG 120: Six Sigma Green Belt

Designed for professionals with little or no prior experience with Six Sigma methodologies, this course helps students develop critical skills required for successful project management. In turn, these students can then aid organizations in understanding, interpreting and using the core concepts of Six Sigma. Specific topics covered include critical skills necessary to successfully lead project teams and how to effectively collect and analyze data.

Course to be sunset by May 30, 2025. The sunset of a course or program does not have any impact on the validity of the earned credential. Students who are not able to complete a program prior to the sunset date will be able to do so with approved replacement courses in accordance with other academic policies.
